ITS GETTING CHILLY!

Here are a few tips to make your apartment safe and cozy in the winter months:

1. On sunny days, open your blinds to let natural sunlight in to naturally warm up the rooms.
2. Keep your thermostat on at least 68 degrees this winter.
3. When its below 32 degrees outside, leave your cabinet doors under the sink open to allow warm air to keep pipes warmer. Also, leave a very slow drip running from the faucet.
4. Try to avoid space heaters since they can be dangerous when left unattended and can bump up yourelectric bill.
